

*Report from the Accessibility Committee
Chair-Marlese Durr
July 2023*

Committee Members: Chair-Elect Alan Santinele Martino, Tani Nguyen, Cameron T. Whitley

The committee received two requests: one for a Printed Program, if possible, and the second to place an item on the Accessibility Committee's radar.

Many conferences have continued offering a remote option for attending, making the conference more accessible to individuals (grad students especially) whose departments do not offer conference and travel funding.

Accessibility should ideally include these considerations, not just functional and intellectual diversity. Conference attendance would become more doable for many underpaid grad students and other attendees. Thanks for consideration of these ideas for future meetings!

A printed program for those persons with accessibility issues is something that the Board of Directors might review, along with the second request for a remote option.
